# Cable recycling - The professionals under one roof

CABLO GmbH is a joint venture between TSR Recycling GmbH & Co. KG and Aurubis AG.

Fehrbellin since 1995 (Brandenburg)

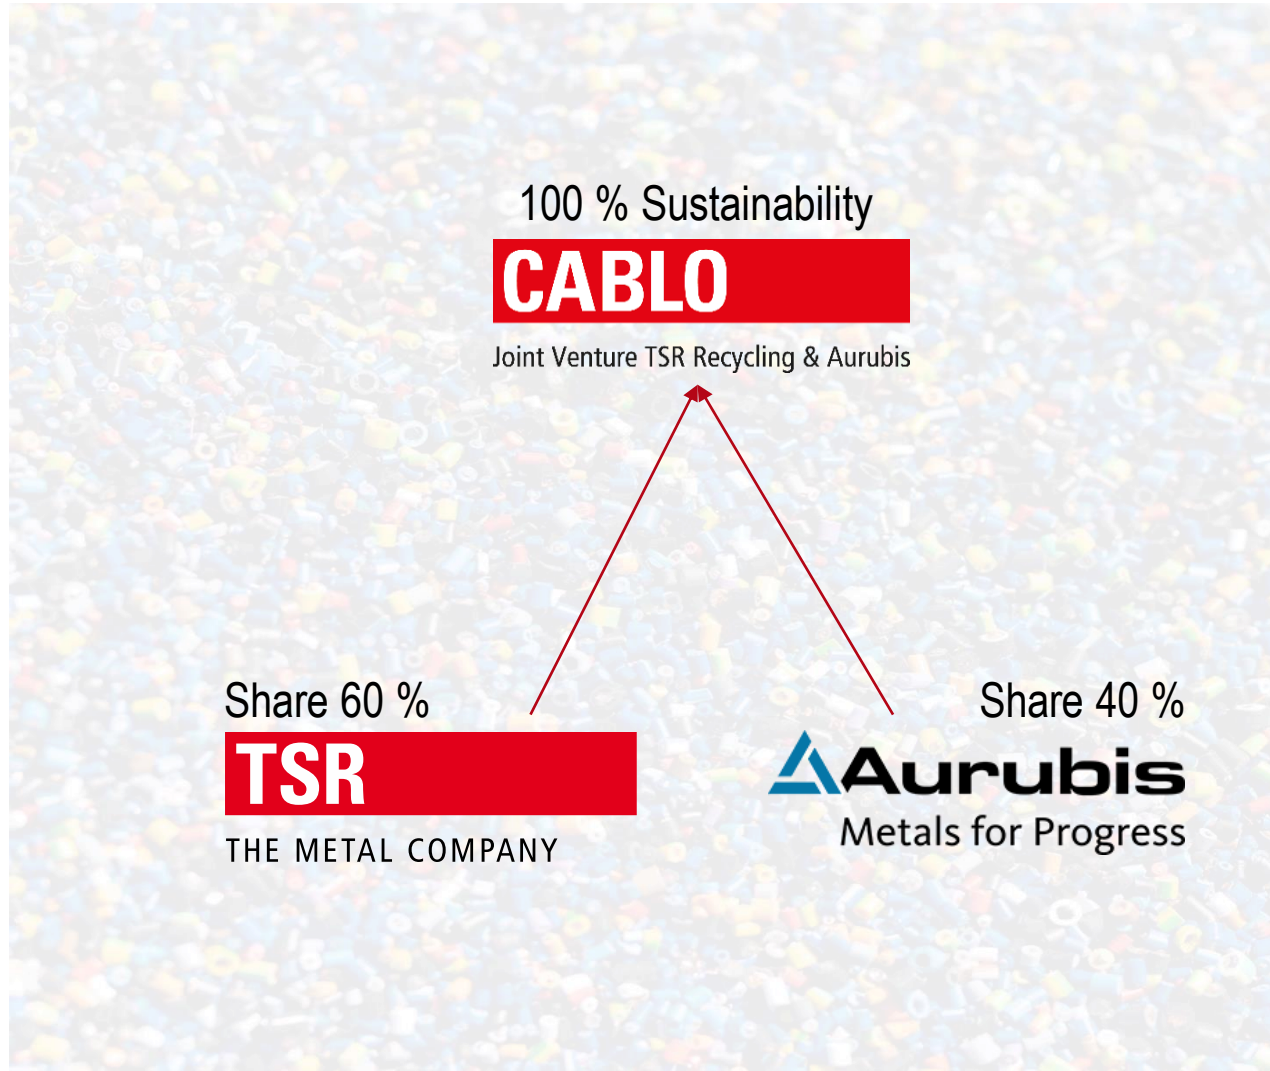

Gelsenkirchen since 2008 (NRW)

Σ 70 Employees

We have been dismantling cables for **several decades** and specialise in the circular economy.

Together we work for the future.

# Close the Loop – Recycling from A to Z

## The specialist for cable recycling

- We offer the end-to-end solution for our business partners in the cable industry and the recycling sector.
- We pay attention to transparency – the entire recycling process can be monitored.

## Raw materials are becoming increasingly scarce

- We recycle 40,000 t of cable annually at the Fehrbellin and Gelsenkirchen site,
- Return 12,000 t of plastic to the cycle,
- And constantly optimise our processes.

## We work for the future

- We recycle using state-of-the-art technology
- Secondary copper reduces energy requirements by 30-80% and cuts CO<sub>2</sub> emissions by 0.2-1.9 t – to this, we actively contribute.
- Because sustainability is our motivation

# What we get out of the waste

## Products of different quality:

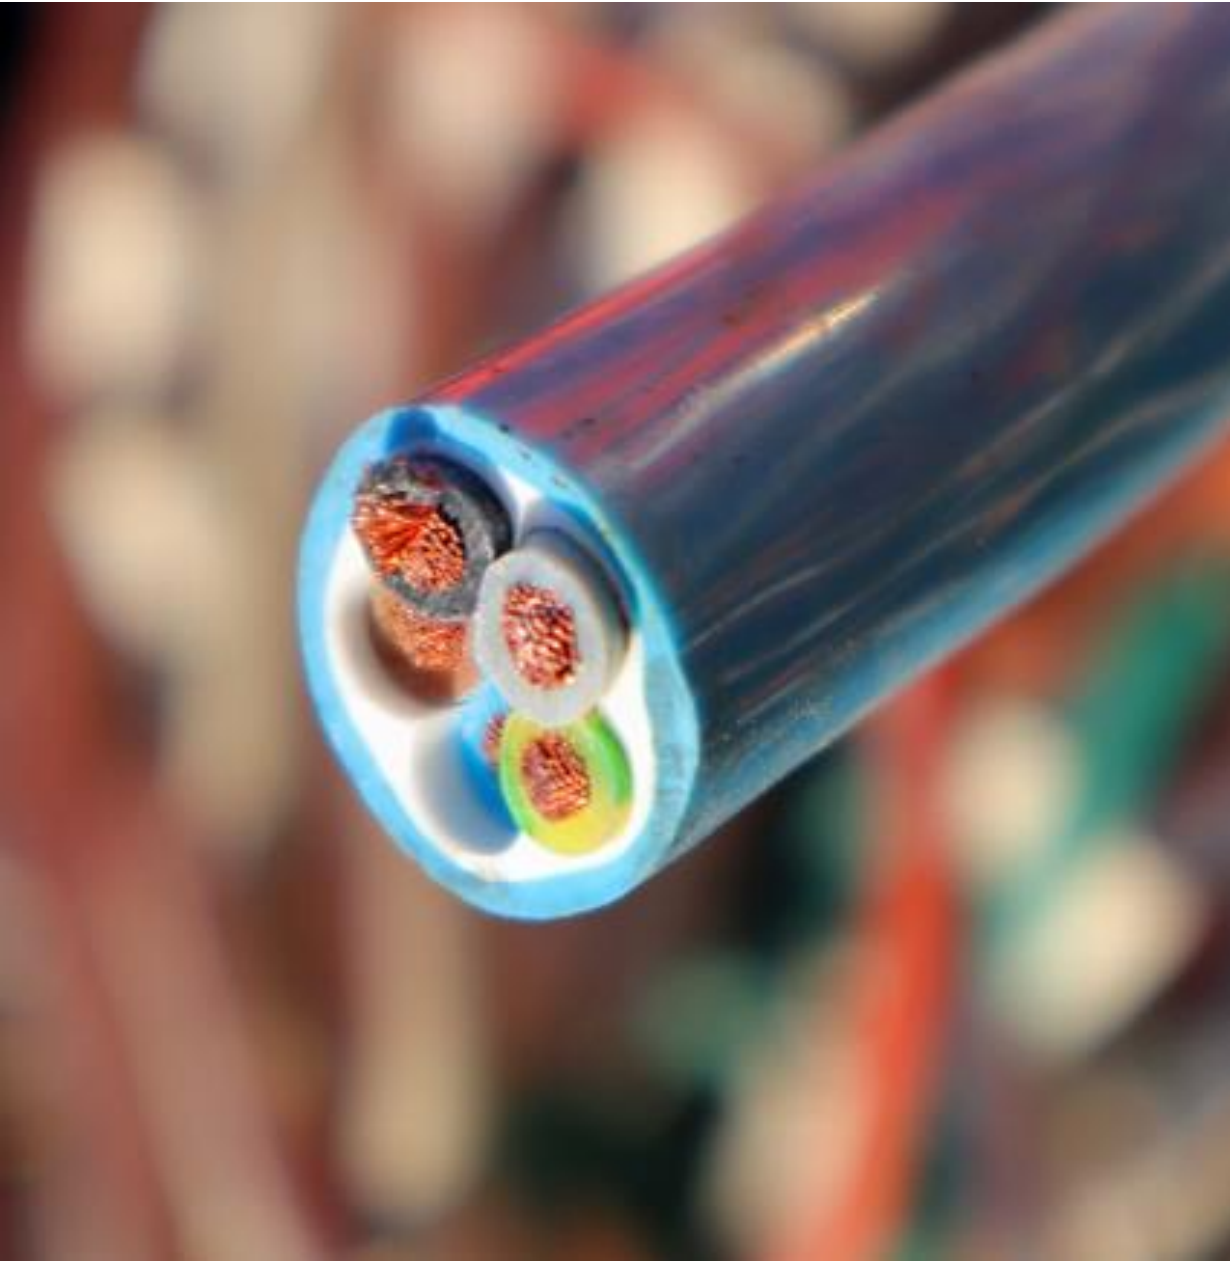

- Substitutes for primary metals
- Substitutes for ores
- Plastic granulate

## And you can find them in:

- ✓ Fittings & sanitary technology
- ✓ Friction linings
- ✓ Chemical catalysts
- ✓ Protective coatings (antifouling)
- ✓ Propellers
- ✓ Beacon feet
- ✓ And much more...
